

perform

We have found that educational processes which utilise these performing arts techniques and involve direct interactions with trained Early Career Researchers – ECRs – foster young people's engagement and broaden their perspectives on science.

We invite you to find your own ways in our Toolkits here! There is more than one path! Enjoy and share!

ENGAGING YOUNG PEOPLE IN SCIENCE AND EXPANDING THEIR PERSPECTIVES

The PERFORM project used performing arts techniques as a focus to: inspire and motivate young people to pursue Science, Technology, Engineering and Mathematics (STEM), and encourage young people to develop a reflective and holistic understanding of science.
